DREXEL METALS + HOME

THE *roof* OVER YOUR HEAD

Your home is your sanctuary. Where your favorite memories are made. It protects your family and is a reflection of who you are.

The roof is a major focal point of your home's design and architecture. Whether your style is open and breezy by the bay, Spanish Colonial, Victorian, or anything in between, there is a metal roof to cap off the story of your home.

DREXEL METAL *quality*

For over three decades of industry expertise, Drexel Metals has earned a reputation for producing roofing systems of exceptional quality, safety, energy efficiency and performance. Our depth of experience combines with a passion for delivering industry-advancing innovation, while maximizing cost efficiencies and sustainability.

Best of all, Drexel Metals Roofing Systems are made locally for you.

BEAUTIFUL + STRONG

unmatched DURABILITY

The roof in your home is a major line of defense against the power of mother nature.

While a common choice is asphalt shingles, a metal roof is the premier product for strength, longevity and carefree maintenance. Asphalt roofing - primarily made of oil-pregnated paper or fiberglass - begins to deteriorate as soon as it's installed. Likewise, wood shingles dry out and crack over time, and concrete roof tile can fracture from freeze/thaw cycles.

Beautiful and strong, Drexel Metals Roofing Systems are precision-engineered to withstand decades of extreme weather like gale and hurricane force winds, heavy snow, hailstorms, and even wildfires. It will not deteriorate and is virtually maintenance-free.

CUSTOM STYLE + APPEAL

ARE THEY NOISY?

This is the #1 question we get asked. The answer is no. Our roofs are typically installed over your attic space with insulation plus your roof deck and our underlayment. This makes our metal roofs no more noisy than other roofing materials on the market.

LIGHT AS A FEATHER

Well, maybe not a feather, but a metal roof is on average 50% lighter than an asphalt shingle roof and 75% lighter than concrete tile, fiber cement shakes and slate.

GOT SNOW?

Metal roofing is a popular choice for homes in areas with heavy snowfall. A metal roof sheds snow quickly, thereby protecting the integrity of the roof and eliminating ice damming at the eaves that can cause water back up and eventually leak into your home.

CUSTOM BEAUTY + APPEAL

Luxurious colors, dramatic lines and graceful curves – from sleek and modern to charming and traditional. We offer a broad scope of profiles, styles and colors to infuse your home with your personal taste.

Choose from pre-painted Galvalume®, pre-painted aluminum, DrexLume™, Fluoropon™ and copper. All are constructed with products proudly made in the USA and installed by local installers.

FIRE + LIGHTNING SAFETY RATINGS

Metal roofs are safer than most roofing material in the event of a lightning strike. They are not combustible and are less likely to start a fire. Also, Drexel Metals Roofing Systems carry a UL class “A” fire rating for roof coverings, which are evaluated for the ability to resist the spread of fire into the attic, resist flame spreading and resist generating burning embers.

BETTER + SMARTER

WHILE THE INITIAL COSTS OF A METAL ROOF MAY BE HIGHER THAN ASPHALT SHINGLES, A METAL ROOF IS THE *better investment* IN THE LONG RUN.

LIFESPAN

Metal roofs last 2 - 3 TIMES LONGER than asphalt roofs. Virtually maintenance-free. No intermittent repair costs.

ATTRACT POTENTIAL BUYERS

A roof can account for 40% of a home's visual impact from the curb¹ and help attract potential buyers should you decide to sell.

GOLD STANDARD TRANSFERABLE WARRANTY

Drexel Metals is the ONLY metal roofing company that provides a warranty that can be transferred to the next owner if you sell your home.

CREATE ROOF ENVY

Drexel Metals Roofs are more than just smart, financially superior investments. They are visually stunning. You'll be the envy of the neighborhood.

+ FAST FACTS

ENERGY EFFICIENT

Drexel Metals Roofs reflect rather than absorb the sun's heat energy, which makes it one of the most energy efficient roof systems available.

THE GREEN CHOICE

Keeping your home warmer in winter and cooler in summer with reduced energy spending is just part of the green story.

MADE OF RECYCLED MATERIAL

100% RECYCLABLE

PERFORMANCE + SAFETY STANDARDS

At Drexel Metals, every product and every project begins with a focus on safety and performance. We strictly adhere to quality assurance standards to ensure our installed roofing systems meet or exceed local and national building code requirements. Our products are tested to withstand gale to hurricane force winds, hail, fire, and wind-driven rain through independent testing and certification. For a complete list of testing and performance data, please visit www.drexelmetals.com.

Warranty Protection

Drexel Metals stands behind our products with industry-leading warranties, including a 35-Year Gold Standard Warranty that covers labor, adhesion, chalk and fade protection and is transferable from owner to owner for the period of the warranty. For complete warranty information, including limitations, ask your contractor for a copy of the Drexel Metals Roofing Systems warranty.
